Hello, Welcome!

About Analytiics

We are a team of young professionals who are dedicated to driving digital change through our passionate and imaginative approach. Our passion for innovation and commitment to excellence means that we are constantly seeking new ways to help our clients achieve their goals. By leveraging state-of-the-art technology and staying ahead of industry advancements, we ensure that our solutions are always cutting-edge and highly effective. We invite you to join us and grow your company alongside ours. Leverage our expertise to improve your digital strategies, streamline your operations, and stay ahead of the competition with the best solutions in the tech field.

Vision

To be a global leader in transforming industries through intelligent automation and data-driven insights, empowering businesses to unlock their full potential and achieve sustainable growth in an ever-evolving digital landscape.

Mission

To revolutionize industries by harnessing the power of AI, Data Science, and Machine Learning, creating intelligent solutions that not only solve complex challenges but also inspire growth, adaptability, and innovation for every business we partner with.

Our Services.

- Data Analytics
- Digital Transformation
- Machine Learning
- Business Intelligence
- Web Development
- App Development
- UI/UX Designing
- Digital Marketing
- LLM Solutions & AI Agents

Our Projects

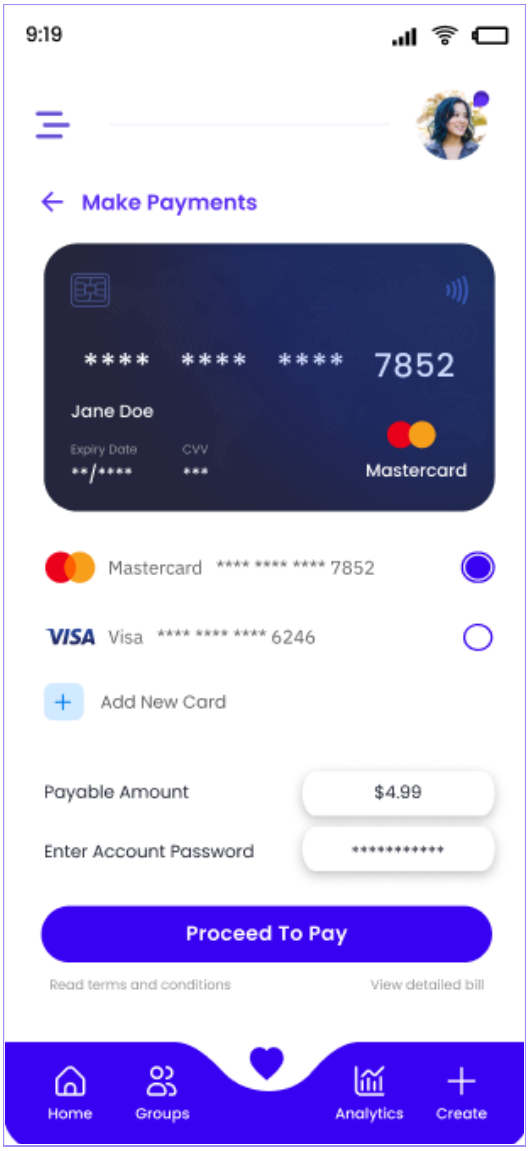
Medconnect: Enhancing the interaction between Doctors and Patient

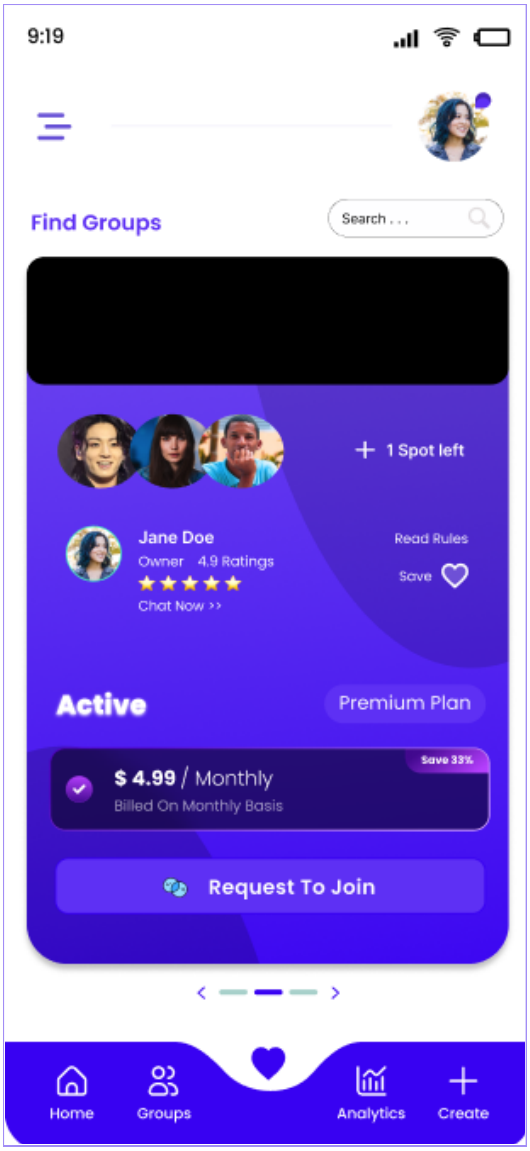
Background: Medconnect, an innovative platform designed to bridge the gap between doctors and patients, identified a need to enhance its application based on user feedback. Medconnect's proactive approach in addressing user feedback resulted in an upgraded app that effectively bridges the gap between doctors and patients. This case underscores the importance of user-centric design in creating successful digital health platforms.

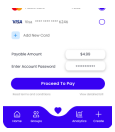
Food Runner App

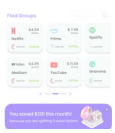
One of the leading QSR chains needed an app to efficiently track and assign delivery partners for incoming orders. The solution involved developing an internal food delivery app that could: track orders in real-time from placement to delivery, assign delivery partners based on proximity, availability, and load, integrate with existing order systems for seamless operations, provide delivery partners with navigation and order details, & offer interface for customer service to promptly address delivery-related queries.

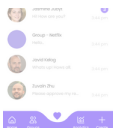
Subscription Sharing App

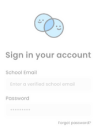


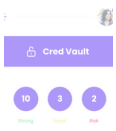




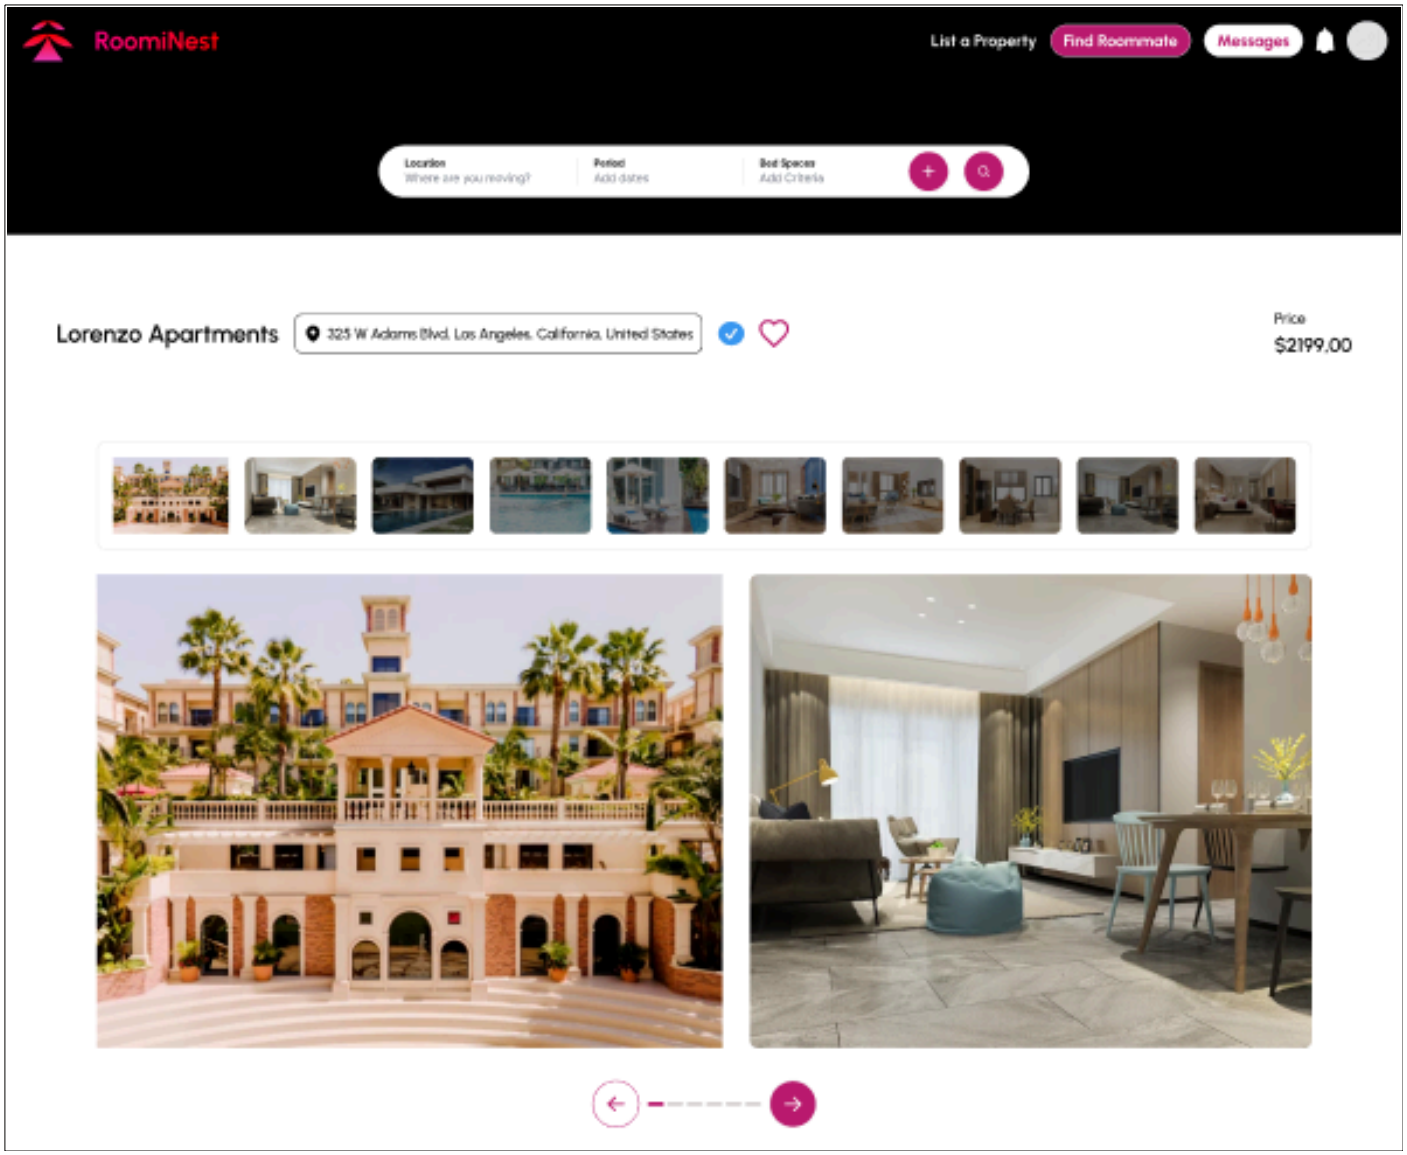


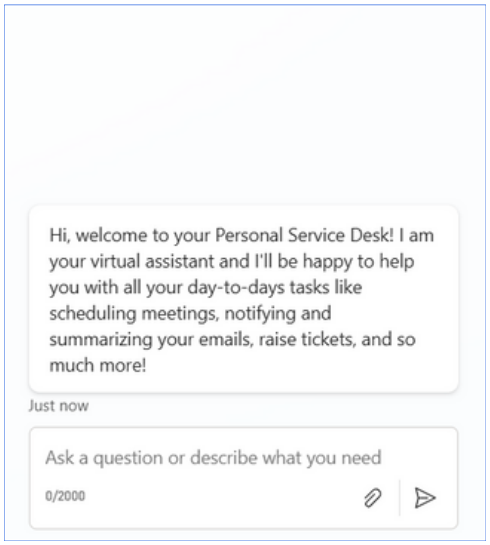






Student Housing Web Application





Personal Service Desk: An LLM Solution To All Employee Tasks and Problems

The chatbot application developed for our client enhances communication and streamlines operations. It features agent escalation for seamless issue transfer to human agents, ticket handling for real-time tracking and updates, and data retrieval and summarization for quick insights. The chatbot also provides a personalized experience, adapting to user preferences, while managing meeting schedules & generating email summaries to keep all information in one place.

Automated Dashboards and Analytics
